
FOUNDATION

The Four Basics

List. Connect. Start the Process. Launch. Repeat.

01 List -- Build your names list

Everything starts with people. Write down everyone you know and keep adding to it. Don't prejudge. Don't filter. Just write.

02 Connect -- Build genuine relationships

Before you mention the business, connect with people. Be interested in their lives. People do business with people they trust.

03 Start the Process -- STP -- move them through the framework

Follow the framework: CI, GNC, PQI, QI1, QI2. You don't need to be perfect -- you need to be consistent.

04 Launch -- Get them started right

When someone says yes, launch them strong. System, names list, team introduction. The first 48 hours are critical.

"This is a cycle, not a checklist. When you launch someone, go right back to listing."
